John Doe

Senior Backend Engineer
john.doe@example.com | +1 (555) 010-0142 | Austin, TX | github.com/example-jdoe

Professional Summary

Backend engineer with 8 years of professional Python experience building high-throughput REST and event-driven services. Led a team of five migrating a Django monolith to FastAPI microservices on AWS, cutting p95 latency by 60%.

Experience

Senior Backend Engineer - Northwind Logistics (2021 - Present)

- Designed Python (FastAPI, SQLAlchemy) microservices handling 4,000 requests/second.
- Introduced Celery + Redis task queues, reducing batch-processing time from 6 hours to 40 minutes.
- Mentored 5 engineers; established code-review and pytest coverage standards (92% coverage).

Backend Engineer - Brightpath Software (2018 - 2021)

- Built Django REST Framework APIs for a SaaS billing platform serving 12,000 customers.
- Wrote Python data-migration scripts that moved 80M rows between PostgreSQL clusters with zero downtime.

Software Developer - Cobalt Systems (2016 - 2018)

- Maintained internal Python tooling and Flask services; automated deployments with Fabric.

Education

B.S. Computer Science, University of Texas at Austin, 2016

Skills

Languages: Python, SQL, Bash, some JavaScript

Frameworks: FastAPI, Django, Flask, Celery, SQLAlchemy

Cloud & DevOps: AWS (EC2, RDS, SQS, Lambda), Docker, Terraform, GitHub Actions

Databases: PostgreSQL, Redis, DynamoDB

Certifications

- AWS Certified Solutions Architect - Associate (2022)
