Maria Garcia

Site Reliability Engineer
maria.garcia@example.com | +1 (555) 010-0158 | Denver, CO | github.com/example-mgarcia

Professional Summary

SRE with 7 years of experience running Kubernetes platforms and automating infrastructure. Uses Python and Go for tooling, and has driven reliability work that held 99.99% availability.

Experience

Senior Site Reliability Engineer - Stratus Cloud Services (2020 - Present)

- Operate 40+ Kubernetes clusters on AWS EKS; authored Terraform modules reused by 12 teams.
- Wrote Python automation (boto3, Click) for capacity reporting and on-call runbooks, cutting toil by 35%.
- Defined SLOs and error budgets; reduced incident MTTR from 52 to 19 minutes with Prometheus and Grafana.

DevOps Engineer - Redwood Fintech (2017 - 2020)

- Built CI/CD pipelines in Jenkins and GitLab CI for 60 services.
- Developed a Go-based deployment controller that automated blue/green releases.

Education

B.S. Information Systems, Colorado State University, 2017

Skills

Infrastructure: Kubernetes, Helm, Terraform, Ansible, AWS, GCP

Languages: Python, Go, Bash

Observability: Prometheus, Grafana, OpenTelemetry, ELK

CI/CD: GitLab CI, Jenkins, ArgoCD

Certifications

- Certified Kubernetes Administrator (CKA)
- HashiCorp Certified: Terraform Associate
